

Week 1 Summary Report

1. Activity Completed

- This week, I focused on setting up the software environment required for the project.
- I researched the necessary hardware and appliances needed for the University of Cyberia Campus Network.
- I created a **Resource Acquisition Report** to document the inventory of routers, switches, servers, and client devices.

2. Tools Used

- **GNS3**: Used to design and attempt to build the network topology.
- **GNS3 VM & VirtualBox**: Used to manage the virtual servers and network equipment.

3. Next Steps

- In the coming weeks, I will focus on the actual configuration of IP addresses and testing connectivity between the devices.
